### Specialists in Software for Distribution

Axiom Software is a leading developer of enterprise solutions for distribution companies with particular focus on electronics and fastener parts distribution.

Developed for both franchised and independent distributors, Axiom's EPDS, for electronic parts distributors, and FDS, for fastener distributors, provides common, as well as industry-specific features and functions, that you need to grow your business and operate at peak efficiency. All functionality is built in. There is no need to purchase additional modules

EPDS & FDS empower you and your people to do more...faster, easier and better. The software is easy to learn and use whether you're an executive or an employee who works in administration, sales, accounting, or the warehouse.

Using the latest Microsoft technology, Axiom's distribution software seamlessly integrates front and back office operations. With Microsoft SQL Server as the backend data repository, EPDS and FDS are highly scalable and allow for maximum throughput. They enable you to look in one place to see all information related to a customer, vendor, or item. Each software package includes a comprehensive financial flash inquiry which provides key statistics and indicators as well as a short term cash forecasting tool/report.

#### Highlights:

- Direct Email and Fax
- Work Order Processing
- Collections Flash
- Bin Stocking and Consignment Inventory
- Customer Web Portal (optional)
- Financial Flash
- All-In-One Counter Sales
- Customer Contract Processing
- Customer Forecast Processing
- Vendor Expedite Process
- RMA and Return to Vendor Process
- Integrated barcode label printing and barcode reading
- Electronic Document Tracking
- Multi-Company, Multi-Currency, Financial Consolidation
- Integrates with Shipping System and Scales

### Drill Down, Don't Fool Around

Getting to the information that you want is easy. For example, let's say that you are looking at a list of recent shipments for a customer and you want to see the details of the invoice. [Double-click] on the invoice number and see the invoice. [Click] again to e-mail, fax, or print a copy. Want to see the details of the parts that were shipped. [Double-click] on the item number. It's fast, easy and intuitive. And once you figure it out, it works the same way across the whole system.

### Communicate With Your Workers

You're working a particular order and you don't understand the pricing. The product people who set up pricing are in home office. You could call, e-mail or Instant Message (IM) with EPDS/FDS. With Axiom IM, you can send an instant message to one or more persons and when you send the message it sends a link to the order that you were looking at. When your co-worker receives the IM, he can [Click] the link and see what you were seeing. It's fast, easy, and intuitive. And once you figure it out, it works the same way for purchase orders, quotes, rfq's, etc.

### Lot Control

EPDS/FDS lot control gives you ultimate control and traceability of your product. Attach supplier certification documents when product is received. Then, when customer orders are fulfilled, print them with the final packing list.

### Production Orders/Bill of Materials

EPDS/FDS provides advanced features to ease the burden of managing production orders. Generate production orders based on customer demand. Or, create quick kits or assemblies when entering a sales order. Or, build a custom assembly on the fly during quoting, with raw materials that your system has not seen before. And in a flash, see the status of all production orders in one easy to use, flexible, comprehensive screen.

### Do More With One Call

If you're looking for software for your distribution company that works the way you work, no fumbling with commands or having to memorize functions, then you owe it to yourself and your company to put Axiom Software at the top of your short list.
